

Save Idlib NOW! No War against Idlib!

For weeks now, courageous women, men and children of Idlib, in North Syria, in their thousands, have been demonstrating for their lives: despite seven and a half years of genocidal bombing, hunger sieges and deprivation of medical care, war fought against their hospitals, their children's schools, their refugee centres and aid workers, bus deportations from their homes (some twice or more times), of torture imprisonments, rape killings and mass disappearances, despite this and more – people in North Syria are collecting en mass on the streets, shouting, we are not terrorists, No Justice No Peace – „the people want the end of the regime“

On World Peace Day, 21.9 2018, we must stand with them, for freedom, for an immediate end to the war – we, normal women, men and children here, must demand Stop Now – to a genocide and mass killing, which has been announced in cold blood in advance, as „liquidation“ and „extermination“ of resistance by Assad and Putin. There can be no peace with genocidal mass murder; Syrians must be free, to choose for themselves.

This World Peace Day is called by the UN: that UN which has now completely caved in to genocidal massacre and torture death in Syria. Documented is, that UN food and medical aid is only administered with the permission of the Assad regime, and in Assad areas – disgracefully, freeing Assad's resources for the further torture campaigns and mass death. UN official de Mistura has said there are „10,000 terrorists“ in Idlib: a tacit green light, for Putin and Assad's clearly pronounced aim, to exterminate them (in a region, which is a UN and Russia declared „deescalation zone“). De Mistura and other UN officials have called for „humanitarian corridors“ to Assad regions – given that most Syrians have lost so many loved ones – to bombing, rape and torture death or forced transcription into the army, where they are forced to fight against other Syrians – The idea of the "Humanitarian Corridors" is unsurpassed in cynicism.

We should also not think, in Germany, that we are not involved: German taxpayers' money bolsters the bankrupt UN support for Assad, BND and services cooperate openly („against terrorism!; a scandal) with Assad's services, Germany forces Syrian refugees here to go to the embassy, be humiliated by the killers of their families and to pay them large fees for documents, and so much more. Merkel's expressed wish to avoid a „humanitarian catastrophe“ in Idlib, will weigh much, much less to Putin than her understanding, expressed at dinner with him in the beautiful surroundings of Meseberg Castle, that fighters must be fought („natürlich, müssen die Kämpfer bekämpft werden“) – for Putin, another green light for mass bombardment of women, men and up to 1.5 million children from the air.

The bombing must stop immediately – humanitarian, food, medical aid, must reach Idlib immediately.

Stand with the people – a free Syria for free Syrians!
